Name: Bhavesh Chaudhari

Briefly explain your design choices and challenges faced in a document.
→
 1. Sticky Navbar: The navbar stays at the top while scrolling, making it easy to navigate.

2. Responsive Flexbox Layout: Flexbox helps align and space items, adjusting nicely for different screen sizes.

3. Animated Background: The #home section has a moving color gradient that adds a cool effect.

4. Clear Text Styling: Easy-to-read fonts with larger headings for emphasis and proper spacing for readability.

5. Interactive Cards: Cards zoom in and show shadows when hovered, making the site more engaging.

6. Mobile-Friendly: The design changes for smaller screens, stacking items vertically and resizing them to fit.

7. Simple Forms: Forms have enough space between inputs and buttons, with hover effects to highlight actions.

8. Minimal Footer: A simple, dark footer with interactive links that respond when hovered.

9. Smooth Animations: Elements like cards fade in smoothly, adding a nice touch when scrolling.

Challenges Faced: No as such major challenges are faced but mostly in responsive design.
